

# Barudan Direct

Barudan America introduces a streamlined way of doing business—Barudan Direct. This approach eliminates the middleman and allows you to deal directly with us—the machine manufacturer.

Established in 1985, Barudan America manufactures and provides sales and service for Barudan embroidery equipment. However, the company's dedication to the embroidery industry began decades before in the 1950's. That's when its parent company, Barudan Co., Ltd. first opened its doors for business and soon took its operation world-wide.

Since the beginning, Barudan America has searched for ways to make the embroiderer's business easier and more profitable. And, that's what Barudan Direct is all about.

## With Barudan Direct, you can count on us for:

- **Factory Direct Embroidery Machines**—First and foremost, Barudan prides itself in offering the best and most complete line of machinery available. When you think Barudan, think industrial strength workhorse.
- **Factory Direct Service**—Service for your equipment comes direct from the factory. Our technicians have been factory trained to ensure your machines are always producing.
- **Factory Direct Training Program**—Barudan America offers a comprehensive training program which covers everything from machine maintenance to embroidery technique.
- **Factory Direct Finance Connection**—To make your equipment purchases more affordable, quicker and easier, we have developed strong relationships with a select group of financing organizations. We help you find a customized plan to suit your individual needs.
- **Factory Direct Global Support**—Barudan America is part of a world-wide network of Barudan companies dedicated to providing the most innovative, high quality equipment available.
- **Factory Direct Research and Development**—Barudan America's in-house engineers and technical staff bring years of experience and knowledge to developing solutions for your market.

# Barudan just keeps on Going...

Whether you're interested in starting a new venture or adding more profits to an existing business, check out the Barudan Elite. Engineered for durability, this single-head machine is one of the wisest investments you'll make. Feature for feature, we dare you to find a better machine.

## More Needles, More Colors, More Options...

Barudan now offers 15 needles. It's easier and faster to stitch those mega-color designs. Use the extra space to keep standard colors on the machine for quicker changeover and faster production.

## Bobbin Sensors Protect Design Quality...

Stops the machine when bobbin needs replacing. Blinking green light signals operator. Great time-saver. Ensures topnotch design quality.

## Super Easy Threading System...

Helps reduce threading time. By using compressed air, thread is shot through plastic tubes to machine front.

## Top Thread Break Detectors Save Time, Increase Production...

Quickly detects thread breaks and stops the machine. Blinking red light signals operator. Eliminates the possibility of time-consuming design repair.

## Simple Operation Extends To Entire Barudan Line...

Controlled by a user-friendly, icon-based automat. Easy-to-understand and easy-to-use. Simply push a few buttons and the machine does the rest. Similar operation for larger models. No need to learn an entirely new set of technology when more machines are added to your business.

Heavy-duty, steel construction. Low maintenance sewing head. Industrial-strength frames. The Barudan Elite is built to handle the toughest production schedules.

## Standard Features

- 15 needles.
- Radius cylinder arm designed for high-quality cap embroidery.
- Industrial-strength construction.
- Individual take-up levers.
- Super quiet operation.
- Quick and easy air-feed threading system.
- User-friendly, icon-based machine operation; standard throughout the entire Barudan line.
- Automatic bobbin thread sensor.
- Automatic color change.
- 300 x 450 sewing field.
- Automatic thread trimmers.
- 174,000 stitch capacity in 10 patterns. Expandable up to 696,000 stitches.
- High-speed serial port.
- Built-in 3.5" disk drive.
- Reads and stores most popular embroidery machine formats.
- Automatic return to origin.
- Digital float.
- Float by color changes.
- Automatic thread break detector.
- Pull out table for tubular framing.
- Program jog movements.
- 300 to 1200 stitches per minute variable sewing speed can be adjusted to suit each individual application.
- Automatic speed control ensures optimum stitch quality.
- Perimeter trace allows you to trace the outline of a design to ensure proper placement.

## Radius Cylinder Arm Allows Unbeatable Cap Embroidery...

Barudan's unique radius cylinder arm fits snugly to the Advantage cap frame. Provides a smooth, even surface for stitching.

## Profitable Option: The Advantage Cap Frame...

The Advantage cap frame is precision engineered for easy use and detailed registration. Enabling faster, more efficient production, this frame is suitable for a complete range of cap styles.

## Versatility Plus...

Embroider a complete range of items – caps, socks, jackets, towels and more. Removable table allows stitching of flat goods. Table slides out for stitching tubular goods and caps. Easy and fast conversion between items. Sturdy frames provide stable sewing surface.
