Big Features In A Compact Package

Don't let the size fool you. This compact fully-automatic 15 needle machine has many of the same great features found on larger Tajima machines. And every detail, every feature, every function is designed to help you:

Make Money In The Embroidery Business.

15 Needles / 15 Colors

More threads on the machine, means reduced setup time.

Thread Break Detection

Machine automatically stops if the upper or lower thread breaks.

Quick Changeover

Easily switch from caps to tubular to flats to cylindrical sewing.

1200 SPM

Sewing Speed

More high-quality embroidery produced in less time.

Multiple Data Ports

Design transfer and machine networking made easy.

640,000 Stitch Memory

Easily store multiple designs in the machine memory.

User-friendly Controller

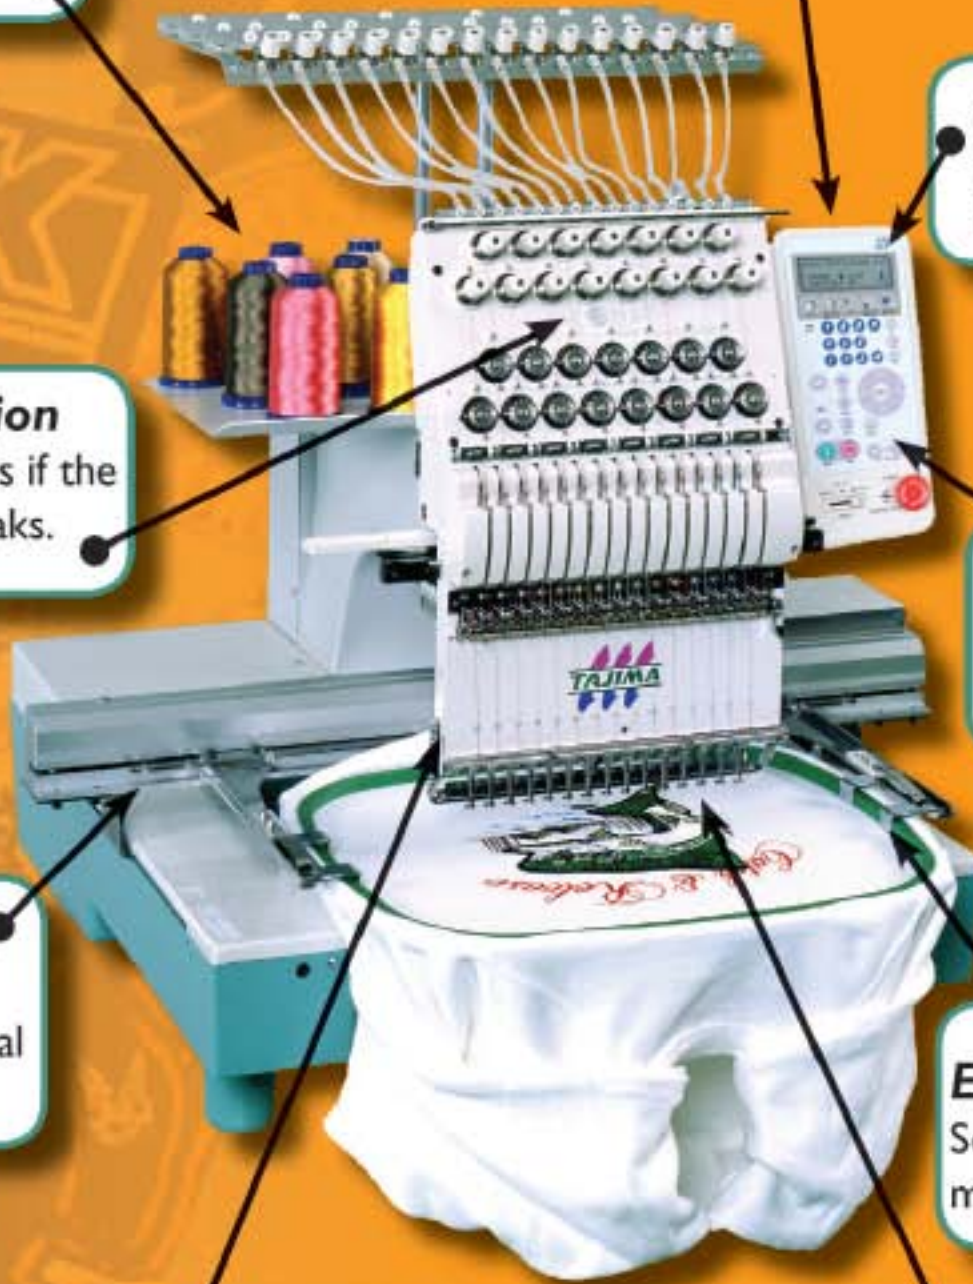

Program jobs easily with just a few keystrokes.

Extra Large Sewing Field

Sewing area of up to 19.5"x14" makes large designs easy.

Auto Thread Trimmers

Upper and lower thread is trimmed automatically during sewing.

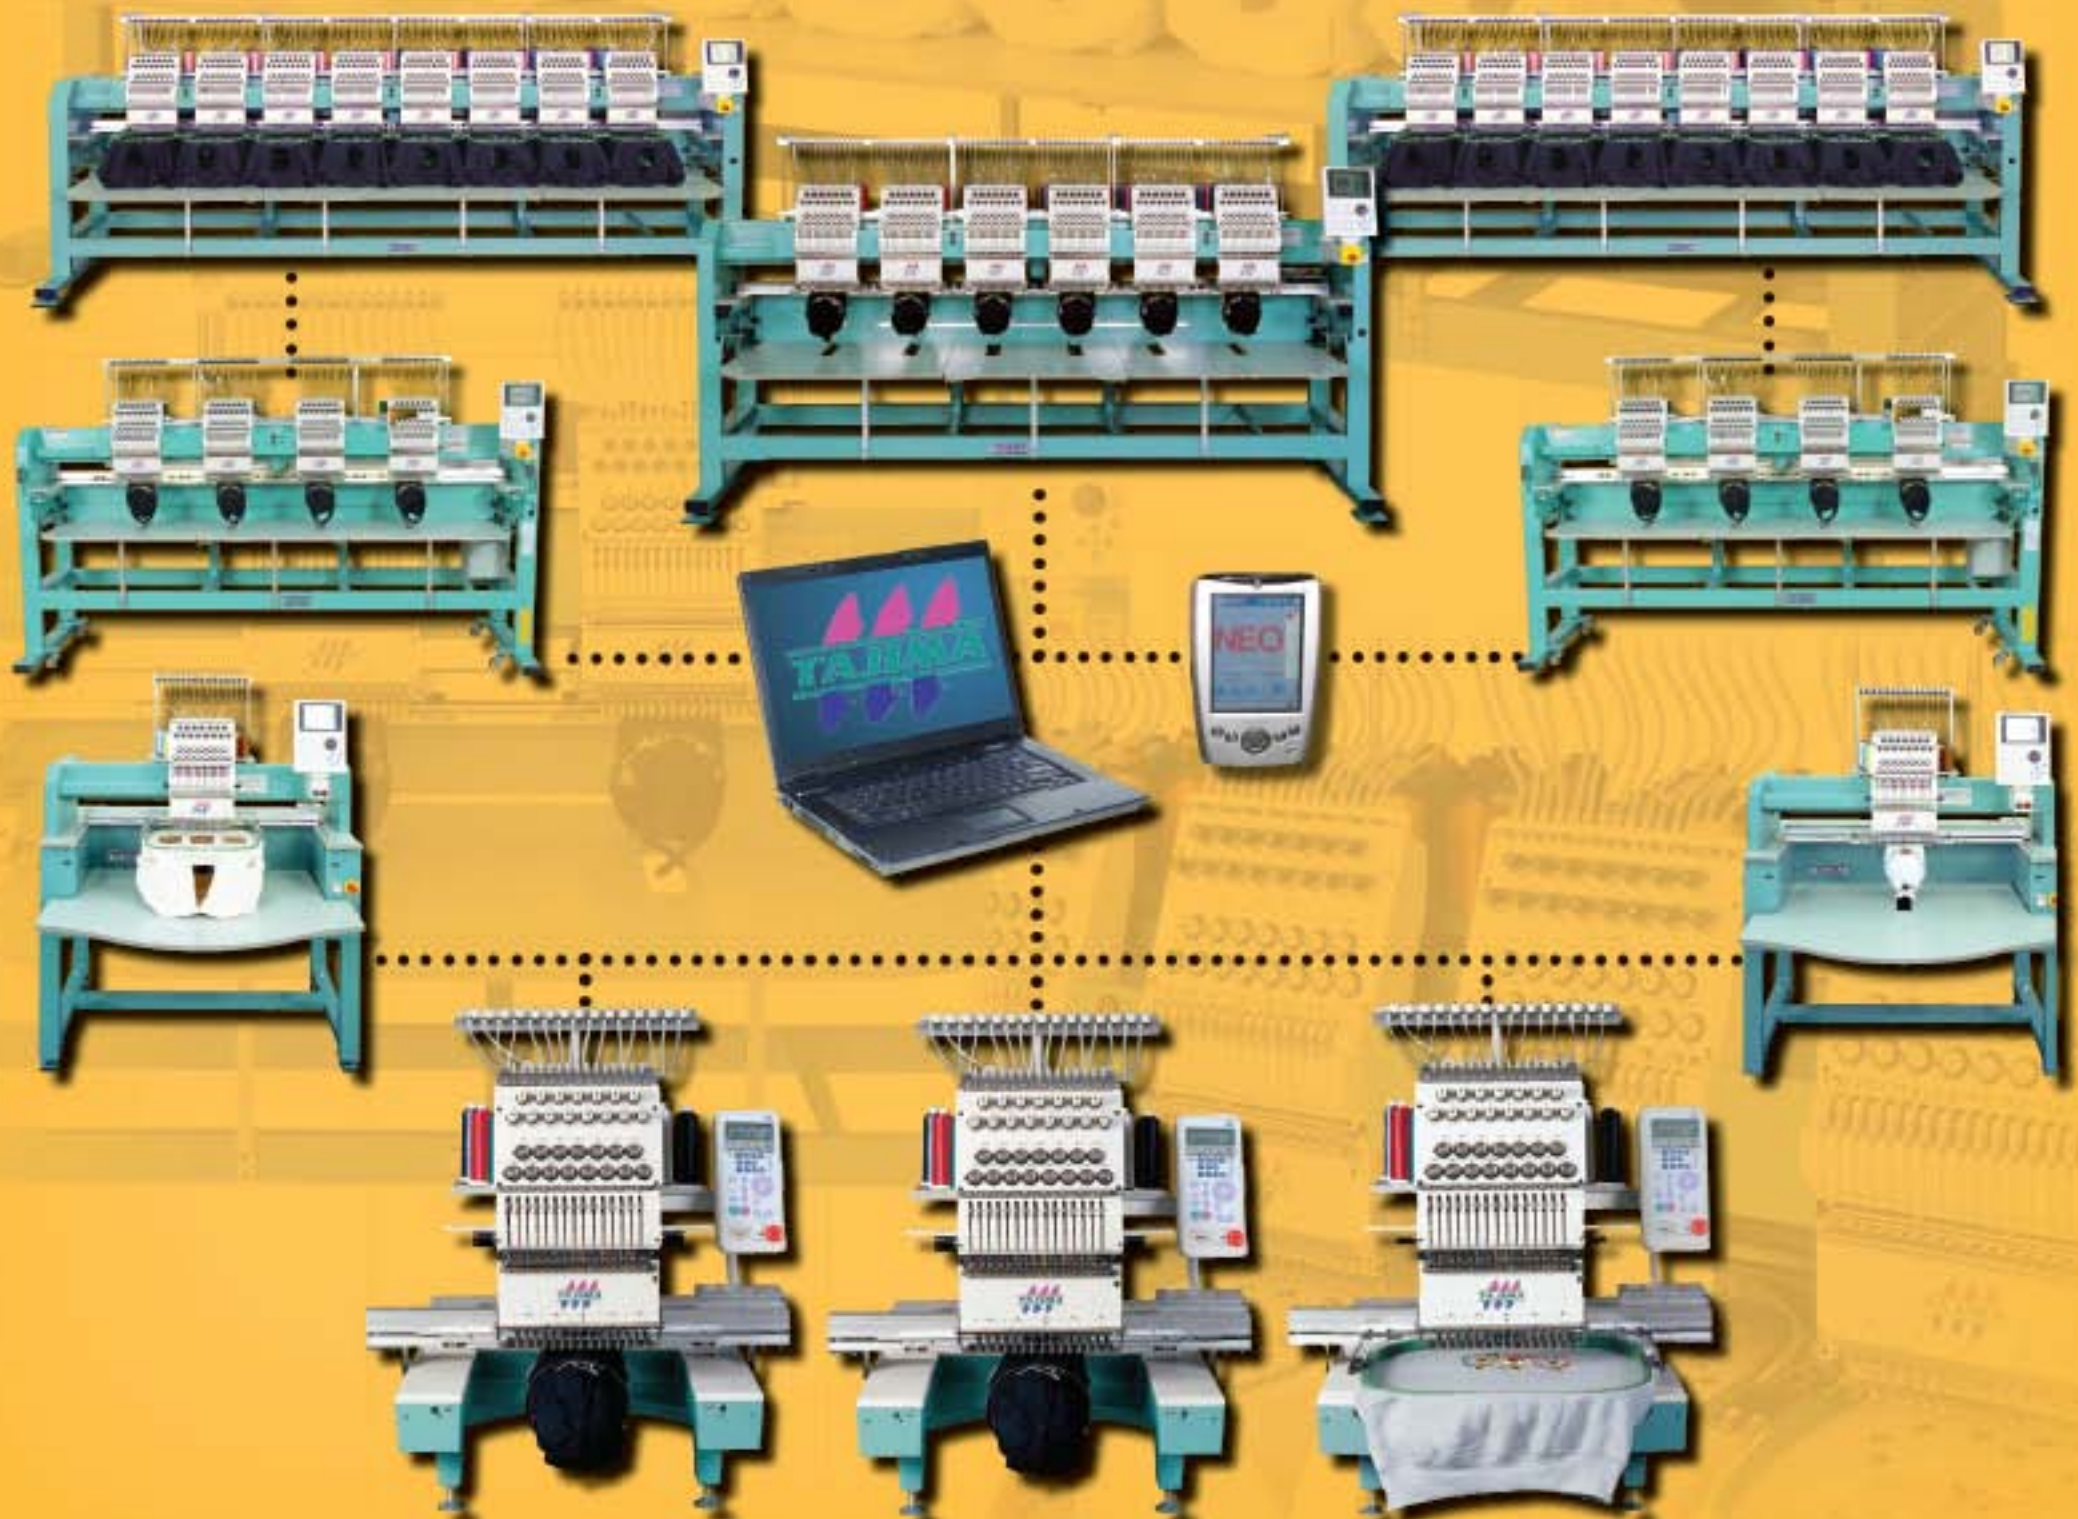

Tajima Grows With You!

Using advanced networking technology, you can easily connect together as many Tajima NEO2's as you wish to create an extremely flexible production system. Sew the same design on all of your machines at the same time, or different designs on different machines simultaneously.

Wired or Wireless — You decide

Unlike most other brands of machinery, Tajima networking is not limited to single-head machines. With Tajima, you can interconnect all of your machines big and small, to create the ultimate modular production system.
