

USB FLASH READER

Embroidery Machine Transfer System™

The USB Flash Reader is compatible with most all of the major industrial (commercial) embroidery machines. Known brands are Tajima, Barudan, Toyota and SWF (coming soon for Happy, ZSK and Brother). If you have any of the know brands, the device should work properly.

The USB Flash Reader connects to the existing ports of most all embroidery machines. A complete list of machines that this device is compatible with can be found at www.EmbAccess.com
